

ITEMS TO CONSIDER WHEN CALCULATING A WATER TAP FEE

Cost to be figured averaging if tap is on mainline side of street or opposite side. Opposite side will take more tubing and the time & effort to push across. Some taps may take granular backfill some may not. Try and figure an average. Some taps will be easy, some won't. Need to average the cost out.

Materials:

tapping saddle	\$ _____
corp. stop	\$ _____
curb stop	\$ _____
curb stop box	\$ _____
meter pit w/lid	\$ _____
tubing, 30 feet	\$ _____
meter & accessories	\$ _____

Material Cost \$ _____

Labor* & Equipment:

2 or 3 people 3 hours	\$ _____
Backhoe	\$ _____
Dump Truck, pump, Shoring etc.	\$ _____

Labor & Equipment Cost \$ _____

Miscellaneous Materials:

Granular Backfill	\$ _____
Traffic Control	\$ _____
Lawn Restoration	\$ _____
