ASSESSMENTS**

No-cost water well
safety assessments,
including bacteria and
metals testing

Keep your water safe with a private well assessment

Know your well
with RCAP's help

Water Well Assessments

Private well assessments through Great Lakes Community Action Partnership RCAP help homeowners ensure the integrity and safety of their water well systems. RCAP can provide a no-cost, in-person water well assessment to inspect wells, evaluate water sources, locate sources of contamination, and offer information for homeowners regarding well safety.

We provide a well head check; recharge area overview; maintenance recommendations; evaluation of geology and possible environmental threats; bacteria testing; inorganic materials and metal testing; and other related services.

Should the assessment uncover problems with the water well, inspectors can offer feasible solutions and help identify federal, state and other funding for water well construction or repairs.

Contact us for a free assessment

If you are interested in participating in a water well assessment, complete and submit your information below to:

Great Lakes Community Action Partnership,
P.O. Box 590, Fremont, Ohio 43420

Information can also be sent via fax to
